Dwane and Marty,

I am sending two sets of spreadsheets. The second contains mostly duplicate of the first set but most likely has some unique data. Both sets were compiled by the CO WQCD.

Subject: Other Water Quality Data not in STORET

Karl,

I am going to be doing a summary of what data we have available in the Water Quality Portal. I know there are definitely data sets that we don't have. Do you have a sense as to what those datasets are, do you happen to have that data? I know you're swamped right now with other requests, so don't spend any time putting together something that you don't have, but anything that you do have would be very helpful. I'll share my summary with you as well once I put it together. It sounds like we're going to be asked to present what we know about existing data sets tomorrow to the Administrator.
